Description

Garrick permanent magnetic lifters provide a safe and reliable solution for lifting and handling steel plates, pipes, beams, and cylindrical ferromagnetic materials. Powered by a high-performance NdFeB permanent magnet, they deliver strong holding force without the need for slings, clamps, or specialised lifting frames.

Features

- 200kg lifting capacity – ideal for small to medium steel workpieces
- Suitable for lifting steel sheets, plates, and cylindrical workpieces made of ferromagnetic material
- Compact and lightweight design for easy handling
- Built with high-energy permanent magnets for strong, reliable holding strength
- Simple lever-operated on/off control – no external power required
- V-shaped slot on holding surface ensures secure grip on both flat and round items
- Supplied with a Test Certificate for compliance assurance
- Meets AS 4991 standard for safe lifting equipment
