### Description

Alcock drill bits are manufactured from M2 High-Speed Steel, renowned as the highest-grade material for superior drilling performance and durability. Each drill bit features precision-ground flutes and a 135° cutting point angle, optimized for industrial applications.

The 135° cutting point ensures smoother cutting in steel by effectively dispersing heat away from the drill's center, enhancing longevity and performance. Additionally, the drill bits are engineered with a split-point design, minimizing material resistance at the tip. This innovative feature eliminates the need for a pilot drill, reduces wandering, and ensures effortless, accurate drilling every time.

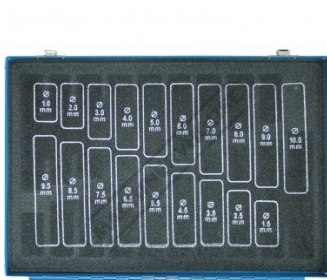

This kit ensures you'll never be left searching for a replacement drill bit after breaking or losing one. Neatly organized in a durable carry case, it's an ideal choice for any workshop or dedicated home hobbyist.
