ORDER CODE:	L0526
MODEL:	RCGT 10T3MO HP
Grade:	K313
Application:	Finishing Medium
Pieces in Set (Qty):	10
[D] Insert IC Size (Inscribed Circle) (mm):	10
[D1] Insert Hole Size (mm):	4.4
[L10] Insert Cutting Edge Length (mm):	~
[S] Insert Thickness (mm):	3.98
[R?] Corner Radius (mm):	~
Relief Angle (Deg):	7°
d (mm):	Ø10
Insert shape (Style):	R - Round

Description

Light to medium-duty machining operations. Low cutting forces and reduced power requirements thanks to a high positive rake face engineered for precise chip control and lower cutting forces in sticky or difficult materials.

K313 grade is optimized for Non-ferrous materials (Aluminium, copper brass), Titanium and titanium alloys High-temperature / Nickel-based superalloys (Inconel, Hastelloy) Cast Irons (Grey and Nodular)

Austenitic Stainless Steels

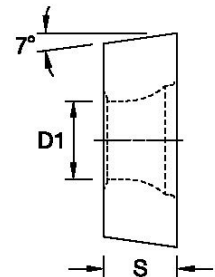

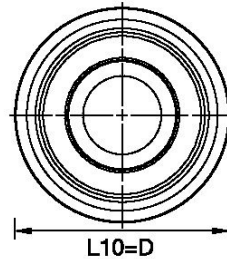

Main application area:

Cutting depth (Ap): 0.5 - 5 mm

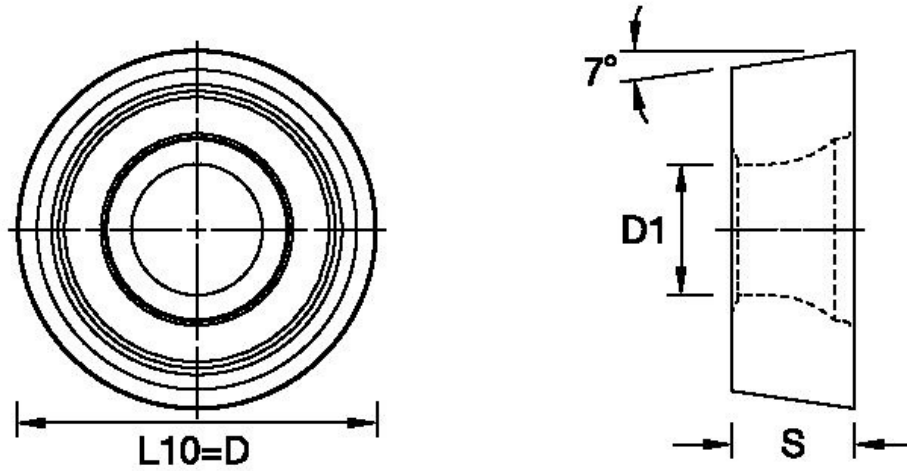

Feed (f): 0.15 - 0.4 mm

Features

- Ø10mm Round Positive Turning Insert
- 10 Inserts Per Pack
- Use Classification - Continuous Slight interruption
