Description

This digital bevel box is a mini protractor that provides digital readings of 4 x 90º with a resolution of 0.1° and auto shut off after 5 minutes. It is small enough to be carried around in a pocket and the LCD screen is convenient to read. It incorporates magnets in the base for accuracy when measuring mitre and bevel angles on mitre saws, saw benches etc.

Works great for mitre saws and table saws in setting blade angle accurately as well as and setting the angle of jointer fences and band saw tables.
