Domed Scraper Chisel - HSS Wood Turning Tool - CH702

25.4mm (1")

ORDER CODE:	R8153
MODEL:	CH702
Set Type:	Domed Scraper Chisel
Number of Pieces (No.):	1
Chisel Size & Type:	25.4mm (1")

Description

Record Power CH702 Domed Scraper Chisel - HSS Wood Turning Tool

(HSS) High Speed Steel material composite is W6Mo5Cr4V2, consisting of Tungsten, Vanadium, Molybdenum, Chromium, Sulfur, Phosphorus, Manganese, Silicon & Carbon. These HSS tools have a very high resistance to wear & softening at high temperatures whilst maintaining a good toughness on the cutting edge, that's very crucial in a good quality turning tool as it keeps its edge sharper than normal carbon steel by a ratio of ten to one.

Durable Material - The handles are made from Beech with an attractive Rosewood stain. This close grained hardwood gives the necessary weight, strength and durability that a good quality tool needs.

Tangs - The handle tangs are long, strong and fully inserted in to the chisel handles.

Handle Shape - The handles are shaped to encourage holding near the bottom to give the best control. Ergonomically designed in consultation with professional turners.

Strong Ferrules To give superior support to the blade in the handle, the walls of the brass ferrules are extra thick and the ferrule is pinned to the handle rather than the less secure crimping method.

Features

- This tool is made from a heavy section of HSS to minimise chatter and vibration and is ideal for cleaning up the insides of bowls, for example removing gouge marks, working from the centre outwards.
