Suits:	SC3 & SC4 Scroll Chuck

Description

62376 Remounting Jaws Mega - Up to 295mm Bowl

In response to many requests, we have increased the capacity of our larger remounting jaws, whilst ensuring they can still clear the bed of lathes with the popular 12" swing capacity and are capable of holding 275mm (10 3/4") diameter bowls in contraction mode. Remounting jaws are incredibly popular due to their flexibility. They work in both contraction and expansion modes and can be fitted behind other jaw sets to create bespoke set-ups to make turning more efficient. The soft stoppers are designed to hold without causing damage, making them ideal for remounting finished or partly finished objects for further work.

Features

- Expansion: 53 - 316mm
- Contraction Spigot: 55 - 272mm
- Contraction Square: 51 - 250mm
