| No. of Piece: | ~ |
| Size: | Ø152mm (6") |
| Internal Thread: | M33 x 3.5mm |
| External Thread: | ~ |
| Suits: | CL3 Lathe |

RECORD POWER

Description

Record Power CWA76 faceplates are the ideal tool for mounting larger or heavier work, for turning across the grain. This steel faceplate is precision machined on external faces to a high tolerance and CNC turned for exceptional accuracy and balance. It features concentric circular grooves to aid the centralising of smaller workpieces. A rough guide to a faceplate's capacity is that pieces can be turned up to three times the diameter of the faceplate they are mounted on.

Features

- Steel Faceplate
- Ø152mm (6") Diameter Face Plate
- M33 x 3.5mm Thread
