S165 - Aluminium Cutting Blade - Carbide Tipped

Ø350mm / 30mm Bore

100 teeth

Back In Stock Soon

Ex GST

\$390.00

Inc GST

\$448.50

ORDER CODE:	S165
Type:	Carbide Tipped
Blade Diameter (mm):	350
Blade Thickness (mm):	3.2
Bore Diameter (mm):	30
Number Of Teeth (No.):	100
Blade Best Suited for - Material Type:	Aluminium (non ferrous)

Description

The Austsaw Aluminium Blade produces an extreme cut. Designed to eliminate blade damage in abusive applications, these blades are tough and very safe to use. The "controlled-triple chip" design makes it virtually impossible to over feed or grab, by limiting the amount of material cut by each tooth.

The Austsaw Aluminium Blade is a good choice for working with thicker solid stock on radial arm, mitre and table saws; also excellent for plastic and woodcutting. ALWAYS clamp and lubricate your work when cutting metals to reduce vibration for smoother, more accurate cuts! Lubrication also helps the blade run cooler and cleaner with less friction, for a longer life.

Features

- Triple chip technology
- Quiet and accurate cuts
- Smooth and fast cutting with less friction
- Lubricant must be used when cutting aluminium
- Designed for cutting:
 - Aluminium
 - Copper - tubes
 - Plastic (PVC Plastic / Pipes)
 - Wood (Engineered Wood Products - MDF, Chipboard/Particle Board and Plywood, Softwoods, Picture Frames, Timber Planks, Weather Board).
- Can be used with:
 - Circular Saws
 - Electric Mitre Saws
 - Radial Arm Saws
 - Table Saws
 - Panel Saws
