## Description

The 13B-C model is a compression bender but uses a slide block to prevent the bend flattening on the back.

This model is a bench mounted or vice operated machine & will produce good quality bends from 12mm to 40mm. Its designed to bend medium wall steel and non-ferrous tube and section forms. An extension handle can be fitted for ease of bending.

The machine is manufactured from high grade materials - steel body, bending arm and clamping gear. Formers are made from high grade iron.

Features include easy accessibility for tube positioning and removal - no necessary clamping for larger size tubes.

Made in Australia

## Features

- Engineered from the highest quality materials
- Simple setup and operation
