Sheet Metal Thread Forming
Must See Video Demonstration

ORDER CODE:	T891
MODEL:	FD-6T
Type:	Thermdrill Thread Shaper
Size:	M6
Material Thickness - Maximum (mm):	~
Recommended Speed - Mild Steel (rpm):	650
Recommended Speed - Stainless Steel (rpm):	585
Recommended Speed - Aluminium (rpm):	650
Collet Sizes:	~

Description

Working with THERMDRILL gives you a significant increase of productivity by reduction of production time up to 50%

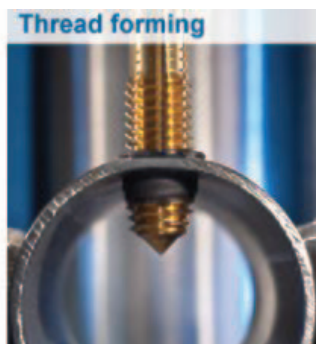

The finished threaded bushing has now 4-5 threads and is immediately usable

Made out of one piece it is 100% twist-free and provides a secure hold especially when it is used with dynamic load and vibrations

Please Note:

Steel - recommended 650rpm to produce correct thread form

Stainless steel - recommended 585rpm to produce correct thread form
