Sheet Metal Thread Forming
Must See Video Demonstration

ORDER CODE:	T892
MODEL:	FD-8T
Type:	Thermdrill Thread Shaper
Size:	M8
Material Thickness - Maximum (mm):	~
Recommended Speed - Mild Steel (rpm):	500
Recommended Speed - Stainless Steel (rpm):	450
Recommended Speed - Aluminium (rpm):	500
Collet Sizes:	~

Description

Working with THERMDRILL gives you a significant increase of productivity by reduction of production time up to 50%

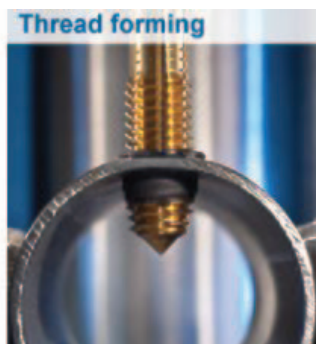

The finished threaded bushing has now 4-5 threads and is immediately usable

Made out of one piece it is 100% twist-free and provides a secure hold especially when it is used with dynamic load and vibrations

Please Note:

Steel - recommended 500rpm to produce correct thread form

Stainless steel - recommended 450rpm to produce correct thread form
