Description

The Multi-step reducer consists of 4 fittings that fit neatly one inside the other. You can use all four, just three, a pair or you can use them individually. Each section has a slight taper to accommodate variations in the internal hose diameter. For instance, the largest section has an outer diameter of 98mm and is a snug fit inside 100mm extractor hose. This fitting also provides an inexpensive and practical solution to connecting different size vacuum hoses in order to gain extra length.

Features

- Reducer from Ø100 to Ø35mm
- 4 fittings that quick release/connect between sections
- Tight connection between fittings
- Larger end connects to Ø100mm (4") dust hose

- Step 1 = 35mm OD to 35mm OD x 42mm long
- Step 2 = 40mm OD to 40mm OD x 50mm long
- Step 3 = 45mm OD to 62mm OD x 60mm long
- Step 4 = 68mm OD to 98mm OD x 70mm long
