Description

The Hafco T-20A thicknesser manufactured in Taiwan with four knife cutter head is a heavy duty machine with very substantial cast iron body and heavy gauge sheet steel base. The cast iron thicknessing table which has a polished surface to help timber slide freely as well as to help reduced vibration to improved quality of cut.

The cutter head is supported by 4 x solid pillars at each corner and the steel drive rollers have ribbing to ensure positive grip on the timber through the machine via two speed gearbox at a rate of 16 or 20fpm. The feed roller pressure can be adjusted with the four adjusters on the top of the machine. The depth of cut is set by means of the cranked handle on the side using the setting scale positioned on the in-feed side or digital readout.
