Description

A wood bandsaw is probably the most versatile machine in any workshop and often the first machine used when preparing timber. This BP-430A bandsaw now includes a electronic safety motor brake system to quickly stop the blade, and a powerful 1500W - 2hp 240V motor, large cutting capacities and all manufactured to quality standards we expect of our range of machines.

The BP-430A manufactured in Taiwan offers excellent safety features including interlocked blade guard doors, safety magnetic nvr power switch, 2 x height option fence, twin extraction ports and is all compliant to CE standard. A rigid welded steel chassis cast iron table and heavy-duty ball bearing blade guides are included, along with a rigid rip fence and precision mitre fence.

An often overlooked feature is the ease of changing the blade; The BP-430A has a quick release blade tensioning lever which substantially speeds up the process of blade changing. Two belt speeds offer the right speed of 488 & 1010m/min. for cutting either a large or small job.

Features

- Quality Taiwanese manufacture
- 415mm throat capacity
- Extra high cutting capacity - 310mm
